HOW IT WORKS

The process.

Quick, painless, and effective.

01 Consultation

We assess your ear health and discuss your symptoms in detail.

02 Examination

A detailed otoscopic examination of both ear canals.

03 Microsuction

Gentle suction safely removes wax – without water or syringing.

04 Aftercare

Personalised advice to maintain ear health long-term.

APPOINTMENT TIME

15–30 minutes

*Doctor-led care,
every appointment.*

WHY MICROSUCTION

The benefits.

Why patients choose microsuction.

- ✓ Improves hearing clarity
- ✓ Relieves blocked-ear discomfort
- ✓ Prevents tinnitus and ear infections
- ✓ No water – safe for sensitive ears
- ✓ Quick procedure, immediate results
- ✓ Suitable for hearing aid users

Signs you may need treatment

Muffled or reduced hearing
A blocked or full feeling in the ear
Ringing or buzzing (tinnitus)
Dizziness or earache
Difficulty using hearing aids

*If any of these sound familiar,
we're here to help.*

AFTERCARE

Looking after

your ears.

After microsuction, your ears may feel a little more sensitive for 24 hours. To protect your hearing in the longer term:

- ✓ Avoid cotton buds and ear candles
- ✓ Keep water out for 24 hours
- ✓ Check-up every 6–12 months

Follow-up appointments are FREE
where clinically required.
